

USA ERRANDS

Vendor Quick Start Guide

Welcome to USA Errands. Thank you for choosing USA Errands as your U.S. storage and fulfillment partner.

Our platform is designed to help businesses store inventory in the United States, fulfill customer orders locally, and maintain complete control over their brand and customer relationships.

Your Brand. Your Customers. Our Backend.

Bridging the gap for global SMEs and shoppers.

HOW IT WORKS

The USA Errands Workflow

1. Create Account
2. Activate MFA & Submit KYC
3. Add Products
4. Fund Wallet
5. Create PSN
6. Ship Inventory
7. Inventory Received & Updated
8. Receive Customer Orders
9. Submit Fulfillment Request
10. We Pick, Pack & Ship

STEP 1: CREATE YOUR VENDOR ACCOUNT

Create your vendor account on **MyUSAErrands.com**.

After registration, please complete the onboarding prerequisites:

- ✓ Activate Multi-Factor Authentication (MFA)
- ✓ Submit your KYC verification documents
- ✓ Complete your vendor profile

Your account will enter the approval process immediately. However, you do not need to wait for KYC approval before proceeding to product setup.

STEP 2: ADD YOUR PRODUCTS

We encourage vendors to begin adding products immediately after registration while KYC verification is being reviewed. This helps speed up onboarding and inventory processing.

Navigate to the **Products** section and add all products you intend to store and fulfill through USA Errands.

Product Setup fields:

- Product Name
- SKU
- Product Description
- Product Images
- Product Variants
- Product Weight
- Product Height (*Optional*)
- Product Width (*Optional*)
- Product Length (*Optional*)

Product Setup Guidelines

Products added to the system become the foundation for Inventory Receiving, Pre-Shipment Notifications (PSNs), and Fulfillment Requests.

Important Notice

Products added to the system **cannot be edited by vendors**. For this reason, all product information should be reviewed carefully before submission.

Please double-check and verify the following parameters:

- ✓ Product Name
- ✓ SKU
- ✓ Product Variants
- ✓ Product Description
- ✓ Product Images
- ✓ Product Weight

Product Weight Requirement

Accurate product weight is extremely important. Shipping costs are calculated primarily using product weight and shipping service selection. Incorrect weights may result in:

- Incorrect shipping estimates
- Additional shipping charges
- Fulfillment delays
- Manual order reviews

For best results, always provide accurate product weights.

Dimensions

Height, width, and length are optional but recommended. Providing dimensions can improve shipping rate accuracy.

STEP 3: FUND YOUR WALLET

USA Errands operates on a wallet-based system. Before creating a PSN, your wallet must contain sufficient funds.

Wallet funds may be used for:

- Receiving Fees
- Inventory Setup Fees
- Storage Fees
- Fulfillment Fees
- Shipping Charges
- Other applicable service fees

Maintaining a positive wallet balance helps prevent operational delays.

STEP 4: CREATE A PRE-SHIPMENT NOTIFICATION (PSN)

Before shipping inventory to our warehouse, create a Pre-Shipment Notification (PSN). The PSN informs our warehouse team exactly what inventory to expect.

Before Creating A PSN:

- ✓ Products must already exist in the system
- ✓ Wallet must be funded

PSN Information Required:

- Shipment Reference
- Carrier Information
- Tracking Number *(if available)*
- Estimated Delivery Date
- Number of Packages
- Additional Notes *(Optional)*

Add Products To Your PSN

A key part of the PSN process is specifying exactly what inventory is being shipped. When creating a PSN, you can only select products that have already been added to your product catalog. You cannot manually enter new product names during the PSN process.

Select the appropriate product and enter the exact quantity being shipped.

Example Shipment Setup:

Product	Quantity
Black Hoodie	50
White Hoodie	30
Baseball Cap	20

Why The PSN Is Important

When inventory arrives, USA Errands will:

- ✓ Receive the shipment
- ✓ Inspect inventory
- ✓ Match inventory against the submitted PSN
- ✓ Verify quantities
- ✓ Store inventory
- ✓ Update inventory records

If discrepancies exist between the shipment received and the PSN submitted, inventory may require manual review before being released for fulfillment.

STEP 5: SHIP INVENTORY TO USA ERRANDS

Once your PSN has been submitted, ship inventory to the designated USA Errands warehouse.

Before shipping checklist:

- ✓ Products added to system
- ✓ Wallet funded
- ✓ PSN submitted

When inventory arrives:

- ✓ Shipment received
- ✓ Inventory inspected
- ✓ Quantities verified
- ✓ Inventory matched against PSN
- ✓ Inventory stored
- ✓ Inventory updated in system

Once processing is complete, inventory becomes available for fulfillment requests.

STEP 6: MONITOR INVENTORY

Your dashboard provides real-time inventory visibility. You can monitor:

- Available Inventory
- Inventory Movements
- Inventory History
- Fulfillment Activity

Inventory levels automatically update as orders are fulfilled.

STEP 7: CREATE A FULFILLMENT REQUEST

When you receive a customer order, navigate to the Orders section and create a new order request.

Provide the following required details:

- Products Ordered
- Quantity
- Recipient Name
- Recipient Address
- Shipping Information

Choose Your Service Type

Option A: Fulfillment + Shipping

USA Errands handles the entire delivery cycle end-to-end. We will:

-  Pick the order
-  Pack the order
-  Purchase shipping
-  Ship the order

Real-time shipping rates and delivery speeds will be displayed before submission.

Option B: Fulfillment Only

This option is commonly used when selling through major marketplace channels (TikTok Shop, Amazon, Poshmark, Etsy, Shopify, etc.). You provide the label, and we handle the backend:

-  Pick the order
-  Pack the order
-  Apply your shipping label
-  Handover to carrier

 **A shipping label must be uploaded before a fulfillment-only order can be submitted.**

STEP 8: ORDER PROCESSING

Once submitted, your orders move quickly through our automated layout workflow:

- ✓ Order reviewed
- ✓ Inventory allocated
- ✓ Products picked
- ✓ Products packed
- ✓ Shipping label applied
- ✓ Shipment dispatched

Most orders are processed within hours of submission.

FEES & BILLING

All applicable charges are automatically deducted from your wallet balance. Charges may include:

- Receiving Fees
- Inventory Setup Fees
- Storage Fees
- Fulfillment Fees
- Shipping Charges

Please maintain a sufficient wallet balance to avoid any potential service interruptions.

SPECIAL CAMPAIGNS & PROMOTIONS

You do not need a permanent U.S. operation to benefit from local fulfillment. Many global businesses utilize USA Errands for structured short-term initiatives:

- Mid-Year Promotions, Product Launches, and Seasonal Sales
- Black Friday Campaigns and Holiday Promotions
- Market Testing and Temporary Volume Surges

Instead of paying multiple international shipping charges for individual customer orders, inventory can be shipped in bulk to the USA Errands warehouse and fulfilled locally throughout the duration of the campaign. There are no long-term contracts required.

EVENT SALES SUPPORT

Can't attend a trade fair, exhibition, market, or pop-up event in the United States? USA Errands can represent your brand on-site.

Services include:

- Merchandise Sales & On-Site Layout Management
- Inventory Management & Logistics Support
- Event Representation & Brand Advocacy
- Post-Event Sales & Detailed Inventory Reports

Your business can maintain a real, active U.S. physical presence even when you cannot attend personally.

FREQUENTLY ASKED QUESTIONS

Do you communicate with my customers?

No. USA Errands only works directly with you. You remain solely responsible for customer service, marketing, pricing, promotions, and direct customer relationships.

Can I monitor my inventory?

Yes. Inventory updates are available through your dashboard in real time.

Can I use USA Errands without a long-term contract?

Yes. Our services are highly flexible and structurally designed around your business needs.

Can I use USA Errands for a one-time promotion?

Absolutely. Many vendors use USA Errands exclusively for product launches, seasonal campaigns, and promotional sales.

What happens when inventory runs low?

You will be able to monitor inventory levels through your dashboard dynamically and replenish stock as needed.

COMMON MISTAKES TO AVOID

- ✗ Creating a PSN before funding your wallet
- ✗ Shipping inventory without an active PSN
- ✗ Adding incorrect product weights to item profiles
- ✗ Entering incorrect product baseline information
- ✗ Shipping products that have not been registered in the system catalog
- ✗ Mismatched quantities between physical shipment and submitted PSN documents
- ✗ Forgetting to upload a shipping label for fulfillment-only orders
